SUBJECT.

Testing of lightening Conductors attached to the Petroleum installations in the State

---

D 992-5 dt 27.8.32

To

The Dir. of Controller to Govt. Elec. Insp. Govt.

Ch. Electrical Engr.

Direction may the Electric Department be permitted to collect fees either before or during Examination of lightening Conductors and the results of such Examination be reported to Govt.

General and Revenue Secretariat | Govt File No. 71 of 1931.

Serial No.	
1	From the Director of I.G. No. 62-15 62/29-30 d. 28/30.3.32. Invites reference to the Govt Notifn of 13th July 1929 amending Rules 6, 7 & 8 in Chs. I, Part II of the Abyssinia Petroleum Rules in the matter of the annual inspection & testing of lightning conductors attached to the several Petroleum installations in the State by the Electrical Dept and states that no inspections installations have been inspected by the General Electrical Inspector during the last 2 years & demands for information of Govt copy of a letter d. 12.3.32 from the Chief Electrical Engineer stating that as the Electrical Dept is now on commercial lines it should be reimbursed for all expenses incurred & for services rendered & requesting that a sum of Rs. 650 may be provided in the Budget every year to meet the salary &c. of that officer & requests early orders of Govt in the matter as no provision in the Budget for this purpose may be obtained & many instructions issued to the Electrical Dept for the annual inspection which is going much in the interests of Public Safety before the close of the year pending issue of orders of Govt re: provision of Rs. 650. The previous file (Govt 39-28) is put up for kind perusal. Orders for endorsing the matter.
WW. 7.4.32	2 It will be seen from the Revised rule 7 of the Petroleum Rules that the inspection

and testing of the lightning conduc-
-tors of petroleum tanks is a duty devolving
on the General Electric Inspector.
Attention is respectfully invited
to the unofficial opinion of Mr J.B. Forbes
the Chief Electrical Engineer ~~Govt~~ J & K
on 21-11-1928 and 1.12.1928
respectively in accordance with
which this duty was ~~voluntarily~~
~~undertaken by the~~ entrusted to the
Electrical Dept as it was the
most fitted for it and the levy
of fees was prescribed.

3 It will be seen from the
Chief Electrical Engineer's letter
No 40363 dated 21/22.3.1929,
in which it is stated "in any case
these proposed fees and rules are
more nearly based on the work
to be done and therefore more
reasonable." That the fees
prescribed would ~~cover~~ more
than cover the labour & skill involved
in testing these conductors.

Thus it will be seen that
though the Electrical department
may reasonably claim the
realizations from the levy of fees
~~that~~ its contention that it should

e ~~to~~ reimbursed for all expenses incurred including the salary and T.A. of the General Electric Inspector seems untenable.

4 It is also for consideration whether the attitude of the Chief Electrical Engineer stating that ~~the~~ further action will be taken only after provision therefor is made in the Dte budget is warranted under rule 7 of the revised rules according to which the examination is a duty legitimately devolving on the Elec: Deptt. The apathy of the Elec Deptt in not replying the Director even after the lapse of 2 years and after the issue of 15 communications has been incidentally brought to the notice of Govt.

5 It may perhaps be enough to issue instructions for the fees being credited to the Electrical Deptt instead of to the Dte Budget.

May the Chief Electrical Engineer be asked to arrange for the ~~immediate~~ examination of the Lightning Conductors without further delay pending case of the realizations from fees being credited to the Elec: Deptt

WD 02553-G DB-60,000-8-50

to arrange for the Examination of Lightning Conductors without further delay - Evidently he forgets that it is the duty of the Deptt to inspect the Connections under Rule 7 Chap I Part II of the Retrent Rules.

20/4/32

Dy Secy)

I agree that the Elect Deptt is not correct in demanding recoupment of charges in respect of the test work. This is a duty which is cast on them by rules framed under Statutory powers. The Deptt should first have carried out the work & then moved Govt. as regards question of cost. The Deptt may Govt may not be asked to do this.

Issue & Submit.

To the Chief Electrical Engineer. No. D5751 d. 12.5.32. Invites attention to Govt notifn of 13th July 1929 in regard to the testing of lightning conductors of petroleum tanks and requests him to arrange for the test & inspection of the lightning installations being carried out without further delay and states that the question of crediting the realisations from fees payable for such test to the Electrical Dept is separately under consideration.

D 5752 — Copy forwarded to the Director of Electrical Inspection
D 5753 — Copy forwarded to the Secretary, Electrical Board

With regard to the 1st Member's query on the previous page it is personally ascertained from the Director's office that no fees have as yet been collected as no petroleum installation having a capacity of 10000 gallons has been inspected & tested by the General Electrical

Inspector as required by the Govt Notifn
of 13.7.29 and that thereupon the ques-
ion as to to what head it should be credited
was not arisen. The Director has also stat-
d in his letter of 20.3.32 that no provision
has been made in the Budget of his Dept
for meeting this expenditure.
Yours for orders.

2/ 31/3/32

SIR,

Ref: Testing of lightning conductors attached to the Petroleum Installations in the State.

I have the honour to invite your kind reference to Government Notification No.D.447-Geol.39-28-18 dated 13th July 1929 amending Rules 6,7 and 8 in Chapter I, Part II of the Mysore Petroleum Rules. Under Rule 6, as revised, all Installations having a storage capacity of 10,000 gallons or more are required to be electrically connected with the earth. Under Rule 7 these connections have to be inspected and tested by the General Electrical Inspector not less than once every year in accordance with the instructions laid down by Government in the Notification referred to above. The fee payable for such tests ranges from Rs.10 to Rs.50 depending on the number of connections.

There are about 12 installations in the State requiring annual inspection under the revised Rules. A Statement showing the particulars of these Installations was furnished to the Chief Electrical Engineer to Government on 21st September 1929. I requested him subsequently to let me know if any of these Installations had been inspected by the General Electrical Inspector and if so, to forward to this office copies of his reports furnishing the results of such inspection. References were made to him a number of times on the several dates noted in the margin*. Though more than 2 years have passed since the Rules were revised, no Installation seems to have been inspected by the General Electrical Inspector so far. An annual inspection of the electric connections of these petroleum Installations is very necessary in the interests of public safety. The work was entrusted to the Electrical Department as it was considered to be properly equipped for undertaking such inspections.

E

I enclose herein for the information of Government copy of letter No.72643 dated 12th March 1932 received from the Chief Electrical Engineer stating that as the Electrical Department is run on commercial lines, it should be reimbursed for all expenses incurred and for services rendered in this connection. A request is made that a sum of Rs.650/- may be provided for the purpose in the Budget of this Department. It

is stated that he would take further action in the matter on receipt of a reply from me. There is no provision made in the Budget of this Department for meeting this expenditure. Further no reference to this payment was made by the Chief Electrical Engineer when the question of the revision of the Rules and the rate of fees to be charged was referred to him by Government in 1929. I request you to be so good as to kindly obtain the early orders of Government regarding the provision of Rs.650/- as required by the Chief Electrical Engineer. As the annual inspection of the Installations under reference is an obligation imposed on the Electrical Department by the Rules, necessary instructions may kindly be issued so that the work is attended to before the close of the year pending the issue of orders of Government regarding the provision of Rs.650/-.

I have the honour to be,
Sir,
Your most obedient servant,

Rajamundry Krishna

to Director also cut from H.S. Govs on Tour
Mas

Letter No.72643 dated 12th March 1932 from the Chief Electrical Engineer to the Government of Mysore, to the Director of Industries and Commerce in Mysore, Bangalore.

Testing of Lightning Conductors etc., attached to the Petroleum Installations in the State.

With reference to the last para of your letter No.C2-1562/29-30 dated 1st March 1932, I have the honour to state that, as the Electrical Department is run on commercial lines, it should be-reimbursed for actual expenses incurred and for services rendered. The testing of the installations enumerated in the list attached to your letter under reference, once a year, may take about a fort-night's time of the General Electric Inspector, including the time required for his journeys, and the approximate cost of his salary and T A for the period will be about Rs.650.

I would, therefore, request you to kindly arrange to provide in the budget of your department every year a lump sum of Rs.650 for this purpose, and transfer the same to the credit of the Electrical Department at the beginning of each year, in order to enable me to get the testing work completed before the close of each official year. Any further addition to the list of installations to be tested by the General Electric Inspector will entail a corresponding increase in the amount payable to the Electrical Department.

On receipt of a reply from you, necessary further action will be taken in the matter.

SIR,

Reference - Testing of Electric Connections of the Petroleum installations in the State.

With reference to the correspondence ending with your lette No. D. 6117/Geol. 71-31-3 dated the 1st June 1932 on the above - subject, I have the honor to state that there are about nine -- petroleum installations in the State where petroleum is stored in bulk in tanks having a capacity of 10,000 gallons or more. The tanks in these installations are required to be inspected not less than once every year under Rules 6, 7 and 8 of Chapter I, Part II of the Petroleum Rules as revised by Government in their Notification No. D. 447-Geol. 39-28-18 dated the 13th July 1929. A statement showing the particulars of these installations, brought upto-date is enclosed herein for the information of Government. The duty of inspecting and testing the electrical connections of these installations is entrusted under the rules, to the General Electric Inspector.

In this connection, I may also state that the installations in question are designed and constructed by the principal Oil Companies at Bombay and Madras and left in charge of their own staff. There seems to be no difficulty in their complying with the provisions of the rules and such other requirements for securing safety as may be - required by the General Electric Inspector. As he is primarily responsible for the examination of the electric connections, I would suggest that it would be better if he arranges for the collection of fees. My reasons are -

The amount of fees to be collected in each case depends on the number of connections of each tank or receptacle and also the number of tests to be made before all the connections are passed and found to be in order.

As the fees have to be paid by the Companies direct - only a few in number - they will pay the full amount to be paid in each case if the same is intimated to them just before or during the - examination of the connections.

The collection of fees by one department and the examination of connections by another would lead to a complexity of correspond -ence and involve considerable delay.

The work that devolves on this department is the scrutiny of reports furnishing the results of inspection by the General Eelectr

Electric Inspector with the remarks thereon of the Chief Electrical Engineer so that I may satisfy myself that the tests are satisfactorily made and that the connections are in order. As the work to be attended to by the Electrical Department is more important it would be justifiable if the entire amount of fees collected by the General Electric Inspector under Rules 6, 7 and 8 are allowed to be retained by the Electrical Department.

Orders of Government may kindly be communicated to me early.

I have the honor to be,
Sir,
Your most obedient servant,

M Ramma Rao
Director.

2. Correspondence ending with letter No.C2 1562/29-30 dated 11th ~~July~~ June 1932 from the Director of Industries and Commerce, requesting, in the circumstances explained orders that the Electrical Department may be permitted to collect fees for testing of electrical connections to Petrol Installation and credit the entire realisations to the Electrical Department.

3. Un-official Note No.76787 dated 16th July 1932 from the Chief Electrical Engineer on the subject.

Order No. P 902-5

Dated, Bangalore, 27th August 1932.

The Director of Industries and Commerce has reported that the collection of fees by one department and the examination of electrical connections by another would lead to complexity and considerable delay and that the General Electrical Inspector who is entrusted with the duty of inspection

and testing of electrical connections, may also arrange for the collection of fees.

The Chief Electrical Engineer who was consulted, states that he would arrange for the testing of lightning conductors attached to the Petroleum Installations by the General Electrical Inspector provided the fees are permitted to be collected by ~~this~~ his -- department.

Government are accordingly pleased to direct that the Electrical Department be permitted to collect fees either before or during examination of the lightning conductors and ~~report~~ the results of such examinations be reported to the Director of Industries and Commerce.

Notification No. D.447/Geol 39-28-18 dated 13th July 1929 amending rules 6,7 & 8 in Chapter I, Part II of the Mysore Petroleum Rules in regard to the Inspection of installations electrically connected and having a storage capacity of 10,000 gallons or more and to the levy of fees for testing them.

2. Correspondence ending with letter No. C2-1562/29-30 dated 11th June 1932 from the Director of Industries and Commerce, requesting in the circumstances explained orders that the Electrical Department may be permitted to collect fees for testing of electrical connections to Petrol Installations and credit the entire realisations to the Electrical Department.

3. Un-official Note No. 76787 dated 16th July 1932 from the Chief Electrical Engineer on the subject.

****

O R D E R No. D 902-5/5-A 71-31-5

Dated Bangalore the ~~25th~~ 27th August 1932.

The Director of Industries and Commerce has reported that the collection of fees by one department and the examination of electrical connections by another would lead to complexity and considerable delay and that the General Electrical Inspector, who is entrusted with the duty of inspection and testing of electrical connections, may also arrange for the collection of fees.

The Chief Electrical Engineer who was consulted, states that he would arrange for the testing of lightning conductors attached to the Petroleum Installations by the General Electrical Inspecto provided the fees are permitted to be collected by his department

Government

Government are accordingly pleased to direct that the Electrical Department be permitted to collect fees either before or during examination of the lightning conductors and that the results of such examinations be reported to the Director of Industries and Commerce.

for Secretary to Government
Development Department.
